

The Home Doctor  
4901 108<sup>th</sup> Street SW  
P.O. Box 98886  
Tacoma, WA 98498-0886

Dear Primary Care Doctor:

Are you ready to consider a career change? A home visit practice may be the answer. Our group has proven this to be a professionally and financially rewarding practice model.

The Home Doctor started in 1998 and has since evolved into an organized system of care. We developed a system for making home visits practical and time efficient. The system includes a proprietary electronic medical record specifically designed for this type of practice. It still leaves room for physicians to practice their own style of medicine.

Running an office is expensive, time consuming, and increasingly difficult to operate profitably. The Home Doctor's lower overhead makes it easy to financially outperform traditional practice models. It also gets you back to increased time with the patient and less with paperwork, personnel challenges, and insurance companies.

The ideal Home Doctor is one who:

Likes his/her independence.

Has five years or more experience.

Is board certified.

Contact me at 253-984-7247 ext. 10 or e-mail: [cp1@mso-wa.com](mailto:cp1@mso-wa.com) if you, or an interested colleague, wish to explore this practice model.

Sincerely,

Charles Plunkett  
President
